

WRITING

Time: 30 minutes

Gr. Education is ^a very important part of our lives. Everybody tries to be clever and well-educated for being ^{ed} respecting. In our society education is a great value.

Gr. I ~~am~~ absolutely agree with Will Durant. Education helps you to understand that you are not perfect. While we are studying anything new we understand that we do not know something interesting or important or we want to learn something else about any theme. You should increase your knowledge because there is always someone smarter. And you try to reach

Gr. knowledges of this person. But we should ~~not~~ do it for someone. You have to do it for yourself. Education has to bring you pleasure and ^h happy ^{inpec}. And, at the end of the day, you should learn it. When you do something for yourself it is more effective.

Gr. To sum it up, people should improve their selves, their knowledge everyday. You should reach your stars. But also ^{we} ~~do not~~ ^{have to} forget about our interests and pleasure.
