/ 25 o.

A lot of people often think about this questions. <sup>1</sup> One's think, that it's true, others think that it's ~~true~~ false. I think, that it's true.

Childhood is a time, when <sup>3</sup> a little boy can understand the people's speech and talk. He <sup>4</sup> can play the toys, computers and a lot of other types of games. He doesn't think about the study, <sup>6</sup> sports, life and <sup>11</sup> the synthemic themes. He <sup>5</sup> plays, laughs and cries <sup>7</sup>. The parents should <sup>8</sup> give him the student's books and other learning school programme. He will learn it at school in future! <sup>9</sup>

My childhood was <sup>10</sup> very happy, and I think, that happy and not serious life should be in the period of childhood because a little kid shouldn't be <sup>12</sup> bored → boring and passive!
