

## WRITING

Time: 30 minutes

Once upon a time Will Durant said  
 "Education is a progressive discovery of  
 our own ignorance." We can say, that he  
 is right, but why?

The education is a <sup>how people</sup> ~~way~~ <sup>discovering</sup> ~~learning~~  
 the world. I think, that <sup>every</sup> ~~all~~ <sup>time</sup> ~~times~~, when  
 we <sup>try</sup> ~~trying~~ <sup>to</sup> ~~to~~ study something, we don't  
 understand, we realize, that we <sup>had</sup> ~~are~~ not  
~~so~~ as smart, as we ~~thought~~. And it ~~is~~  
 repeats all times! When you ~~are~~ ~~learning~~  
 something you get smarter, but your  
 ignorance doesn't leave you. You just  
 understand that while you educate you  
 • ~~discover~~ about yourself more, when you  
 want. You just ~~forgetting~~ about your ignorance  
 while you ~~studying~~.

Education is an ~~essential~~ ~~important~~ ~~part~~ of  
 our life, and ~~we~~ ~~are~~ ~~an~~ ~~integral~~ ~~part~~ ~~of~~  
 live without ignorance. We always realize  
 that we are not so ideal. But ignorance  
 helps us to study. It's good, when  
 we understand this. It's our life and  
 no one ~~ignorance~~ ~~can't~~ ~~stop~~ us to  
 discover the world.
