Essay.

How often do you see teenagers slouching or just sitting with a round back? How often do you hear them complaining about their aching back or neck, despite the young age?

The problem is, many ~~sets~~ ^{people}, especially teens, for some reason or another neglect sport activities. But how exactly is it important to do sports on a regular base?

First of all, by doing some kind of sport regularly you can decrease the risk of getting ill and prevent problems like aching back from happening in the future. You can also improve your posture by gaining muscles to support your back, and neck. ~~Perfect~~ that proves why it is so important to keep fit and do sports.

Secondly, doing sports can affect your social life, in two ways. One is that you can make acquaintances with people who you go to the gym or group trainings with. Moreover, sport can make you look ^{more} appealing so it may ~~retire~~ get easier to meet new people.

Thirdly, sport has some impact on your mental health. If you are easily irritated and often in a bad mood, ~~just~~ exercising can help you get rid of stress and make you feel happier.

To sum up, it is crucially important to practise sports regularly, as by doing so you get a lot of perks. For example, not only sport helps you be ^{and remain} healthy as you grow older, but it also makes your communication with people a lot easier and helps you release ~~bad~~ negative energy.
